Professional Summary

I enjoy taking an idea, figuring out how to make it work, and turning it into something people can actually use. With experience in software development, backend engineering, and AI/ML, I'm always curious to learn, experiment, and build solutions that solve meaningful problems.

Education

Bachelor of Technology in Computer Science 4th Year
Atria Institute of Technology, Bengaluru *Aug 2023 – May 2027* — *CGPA: 8.4/10*

Experience

AI & Full Stack Developer Intern Jul 2025 – Dec 2025
Aadvik Teklabs

- Built 3+ AI-powered web modules and integrated 5+ API endpoints to improve scalability and data flow.
- Optimized REST API integration and backend processes, reducing application response time by 25%.

AI/ML Developer Intern Feb 2026 – Apr 2026
Ellipsonic

- Developed 2+ ML models through preprocessing, training, validation, and testing across 25+ scenarios.
- Improved model accuracy from 88% to 92% through feature engineering and hyperparameter tuning.

Software Development Intern May 2026
Rapid Software Solutions

- Created and maintained 4+ client-facing web application components using modern development practices.
- Resolved 10+ production issues and shipped feature updates to improve usability and reliability.

Projects

InsightFlow AI | *Python, FastAPI, Next.js, Gemini API, Pinecone*

- Built a multi-agent pipeline for automated news aggregation, deduplication, ranking, and research.
- Implemented Gemini-powered RAG for citation-backed summaries, sentiment analysis, and impact prediction.

Deepfake Detection Platform | *Python, Flask, Firebase, TensorFlow, OpenCV*

- Built an AI-based web platform to detect manipulated content across 2 media formats: images and videos.
- Integrated Firebase services and automated reporting redirection, reducing manual reporting steps by 50%.

NavAble | *React, Google Maps API, Firebase, Node.js, Tailwind CSS*

- Created an accessibility-focused navigation platform supporting 3+ route and location recommendation features.
- Implemented real-time Firebase updates to manage verified accessibility data for 25+ public locations.

Technical Skills

Languages: Python, Java, C++, C, SQL, TypeScript
Web & Backend: HTML5, CSS3, JavaScript, React.js, Node.js, Express.js, Flask, REST APIs, Tailwind CSS, Prisma ORM
AI/ML: Machine Learning, Deep Learning, Computer Vision, OpenCV, Gen AI, LLMs, LangChain, OCR, Retrieval-Augmented Generation (RAG), Feature Engineering
Databases & Cloud: MySQL, MongoDB, Firebase, Azure, AWS, Docker
Data & Dev Tools: Pandas, NumPy, Matplotlib, Git/GitHub, CI/CD, Postman, n8n, Workflow Automation
Core CS: Data Structures, Algorithms, OOP, Operating Systems, Computer Networks, Role-Based Access Control (RBAC)

Achievements

- National Chess Champion.
- Winner of the Machine Learning Project Expo among 100+ participants and SIH Quarter Finalist
- Selected for IDE Bootcamp from 20,000+ applicants and showcased project at Bengaluru Tech Summit.
- Winner,Shark Tank Business Pitch among 25+ teams.
- Winner, District-Level Robotics Competition among multiple schools.

Leadership

- Led 3+ hackathon teams, including Smart India Hackathon, to finalist-level project submissions.
- Coordinated 2 major events as a core organizer for Under25 Summit and Cicada Annual Branch Fest.
